

Tsunati Professional Services for Veeam

SIMPLE | FLEXIBLE | RELIABLE | EXPERIENCED

As the third wave of digital transformation takes form, an Intelligent Hybrid Cloud services company has emerged. Focused on client obsession, tsunati is a fresh approach to problem solving and actualizing strategic vision. Tsunati offers a personalized experience with client satisfaction at the core of what we do. As a technology agnostic service leader, we embrace all technologies and partners. We enable our clients to take back freedom, control and value out of their enterprise, across industries and globally.

CLIENT CENTRIC SERVICES

Data Protection Cloud Computing Virtualization Employee Training

Your single professional services and integration company specialized in Data Protection, Cloud Computing, and Virtualization. We deliver the HOW on what technology vendors have sold you so that investment doesn't become a sunken cost, but instead a meaningful return on investment.

Tsunati Health Check

COMPREHENSIVE AGNOSTIC ANALYSIS

As a patient, health insurance allows us to work with a specialist to enhance our wellness and to treat us when we feel ill. Similarly, our I.T. environments need assurance; with a routine health check from a specialist to assist in treating complications and detect major issues before they become serious. Tsunati will assess the environment and through realworld data protection expertise; we deliver actionable insights to better maintain, improve and help transform the health of your disaster planning and readiness.

Customer-centric Service
Our customer-centric services are tailored to your needs, with our real world technical knowledge we are able to satisfy all your needs.

Comprehensive Analysis
We deliver a comprehensive agnostic analysis followed by documenting all actionable insights that are identified.

Proactive Care
Your data-protection environment requires the same proactive care to help anticipate and treat complications before they become a disaster.

WHY CHOOSE US

Data Protection Routine Health Check Cost Effective

Tsunati Ransomware/ Cyber Resiliency

OVERCOME ANY CYBERTHREAT WITH A SINGLE SOLUTION-TSUNATI WORKSHOPS

Ransomware is a disaster that costs businesses nearly two million dollars (US) per incident. Tsunati is your top choice for ransomware protection, as it ensures a secure backup and recovery, both on-premises and in the cloud. Tsunati has developed a 5-day workshop to save your business from ransomware attacks and millions of losses. Tsunati is conducting a 5-day workshop to teach your employees about the essentials of ransomware and train them on high-quality cybersecurity practices to protect your business and organizations from the devastation of ransomware attacks.

HOW TSUNATI PROTECTS AND RECOVERS FROM RANSOMWARE:

- Detect Ransomware
- Data Protection
- Verify Backups
- Instantly Recover

Tsunati TAM Program

ACCELERATE SOLUTION TIME TO VALUE

Technical Account Management Services provide your organization with a Veeam subject matter expert, advocate and advisor who will equip your organization with proven methodologies and exclusive tools to help keep your Veeam initiatives on track.

- Accelerate your Veeam solution time to value.
- Increase IT staff knowledge and abilities.
- Optimize operations to realize cost savings.
- Reduce operational risk with health checks and best practice guidance

Tsunati University

EXPLORE THE NEW POSSIBLE!

Less than 1 in 10 companies have trained staff to use new software tools causing them to use them incorrectly or not at all. There is a tsunami of new technologies being introduced and overwhelming the market every day. Companies invest millions in these technologies, yet some experts claim nearly 40% of these technologies never get utilized or deployed as intended.

Tsunati stands loyally beside you to the edge and beyond and anywhere between you want to go. Enhance your knowledge, add to your skill set and achieve more with our advanced video trainings.

WHAT WE OFFER

(Veeam Powered Service Academies)

Tsunati Lifeline Workshops

SOLVING REAL-WORLD CHALLENGES

Our unique workshops identify popular current technical challenges that have been extremely difficult for most people to resolve, there might be some details on the web, but no practical real-world knowledge is available when trying to execute the solution on your own. NSX-NSXT is a prime example of that.

MAKING CHALLENGES POSSIBLE

The workshops are hands-on, meaning the session usually takes three weeks to complete step-by-step hands-on instruction on how to implement these challenging solutions/migrations. It is a cross between training/education and actual deployment services. We ofcourse will deploy remediation or actual in-person or remote services if a customer needs that last mile of help, but the goal is to give the customer enough information that they can more easily solve the implementation themselves. This is why we charge more than a basic training class and why we charge less than an actual services deployment.

NSX-V TO NSX-T MIGRATION:

All the companies are obligated to do data migration by January 2023, but 70% fail to comply as it is a risky and complex process. Tsunati offers you practical, real-world workshops to teach you how to migrate from VMware NSX for vSphere to NSX-T. The workshops are hands-on, meaning the session usually takes three weeks to complete step-by-step, hands-on instruction on how to implement these challenging solutions/migrations. It is a cross between training/education and actual deployment services.

HOW TSUNATI WILL HELP NSX CUSTOMERS THROUGH THEIR JOURNEY:
