TSUNATI LIFELINE WORKSHOPS

TSUNATI LIFELINE WORKSHOPS

Our unique workshops identify popular current technical challenges that have been extremely difficult for most people to resolve. There might be some details on the web, but no practical real-world knowledge is available when trying to execute the solution on your own. NSX - NSX T is a prime example of that. The workshops are hands-on, meaning the session usually takes three weeks to complete step-by-step hands-on instruction on how to implement these challenging solutions/migrations. It is a cross between training/education and actual deployment services.

We of course will deploy remediation or actual in-person or remote services if a customer needs that last mile of help, but the goal is to give the customer enough information so that they can more easily solve the implementation themselves. This is why we charge more than a basic training class and less than an actual services deployment.

SOLVING REAL-WORLD CHALLENGES MIGRATING FROM VMWARE NSX FOR VSPHERE TO NSX-T

Are you confident in your ability to perform your required NSX for vSphere to NSX-T migration in your multi-tenant environment?

VMware is the end of life to NSX V. Their latest guidance says that they have to be migrated by January 2023. Then why has 70% of the current install base not yet migrated? Because it's risky and it's complex. Furthermore, there is no real data available to guide the process. On the web you find whole migration guides, these utilities are usually free. But nobody knows how to do it. There is no knowledgeable real-world hand-holding workshop to guide you through to actually solve it.

TSUNATI TAM PROGRAM

TSUNATI TAM PROGRAM

Business stakeholders are challenging IT organizations to identify, utilize and prove how technology is helping them drive business outcomes. IT organizations are being driven to move away from operating mode and focus on strategic projects that propel the business forward. This is why you need Veeam technology to help you innovate faster, reduce costs and gain efficiencies. Your organization must determine the best way to accelerate Veeam solution time to value and optimize current and future technologies, while reducing risk and cost. Veeam Technical Account Management Services can help.

TSUNATI TAM PROGRAM

Technical Account Management Services provide your organization with a Veeam subject matter expert, advocate and advisor who will equip your organization with proven methodologies and exclusive tools to help keep your Veeam initiatives on track.

Accelerate your Veeam solution time to value.

Increase IT staff knowledge and abilities.

Optimize operations to realize cost savings.

Reduce operational risk with health checks and best practice guidance.

TSUNATI HEALTHCHECK

TSUNATI HEALTHCHECK

As a patient, health insurance allows us to work with a specialist to enhance our wellness and to treat us when we feel ill. Similarly, our I.T. environments need assurance; with a routine health check from a specialist to assist in treating complications and detect major issues before they become serious.

Tsunati will assess the environment and through real-world data protection expertise; we deliver actionable insights to better maintain, improve and help transform the health of your disaster planning and readiness.
